Product Features

- Modular design for easy adaptation to room air-flow dynamics
- Continuous filtration and decontamination modes
- Multi-stage mechanical filtration to trap 99.97% particles upto 0.3 microns
- TiO2 photocatalyst for decontamination booster and removal of organic compounds
- Dual UV Lamps for germicidal effect
- Air decontamination using FTSS for maximum decontamination
- Wireless Controller & receiver based system for remote programming and control eliminating the need for entering the room for controlling and programming the machine

Product Specifications

- Weight: 20 Kg (approx.)
- Electrical: 220/250 Volts, 50 Hz, 1 Kilo Watt (maximum)
- Fan air output: 430 (H)/300 (M)/200 (L) Cfm per hour
- HEPA filter: Efficiency: 99.97% @ 0.3 Microns
- Dust purifying rate: 99%
- Formaldehyde purifying rate: 95%
- Benzene purifying rate: 99.8%
- Area recommended (3 M Height): 40 M²
- Mobile Floor Mounted, noise less, vibration free and shock proof body

Decontamination Module

Filtration Module

Fumigation Module
